Professional Summary

Frontend Developer skilled in React.js, Next.js, and modern JavaScript ecosystem, with experience in building responsive, component-based web applications and integrating REST APIs. Proficient in developing scalable UI systems using Tailwind CSS, state management, and reusable architecture patterns. Familiar with full-stack development using MERN stack and database-driven applications.

Education

Chandigarh Engineering College, Landran

Bachelor of Technology in Electronics and Communication Engineering

Aug 2022 – May 2026

Punjab, India

Technical Skills

Languages: , JavaScript (ES6+), SQL

Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, HTML5, CSS3, React Router, Axios.

Database: MongoDB, MySQL, Schema Design, Data Modelling

Cloud & Tools: Git, GitHub, Postman, Chrome DevTools, Vercel, Render, Lighthouse

Concepts: OOPS , Computer Networks, Operating Systems, Debugging, Troubleshooting, adaptive UI Design, State Management, Component-Based Architecture

Industrial Training

ThinkNext Technologies Pvt Ltd

Jan 2026 – June 2026

- Completed a 6-month industrial training in MERN stack development, gaining hands-on experience in building full-stack web applications using React.js, Node.js, Express.js, and MongoDB.
- Developed and contributed to frontend-focused web interfaces using React.js, implementing reusable components, responsive layouts, and API integration for dynamic data rendering.
- Worked with REST APIs for data fetching and state-driven UI updates, improving understanding of client-server communication and application flow.

Projects

Mentra

React.js | Node.js | Express.js | MongoDB | JWT

- Developed a role-based referral and mentorship platform using React.js, Node.js, Express.js, MongoDB, and JWT Authentication, enabling secure interactions between freshers and professionals through REST API-driven workflows.
- Integrated 20+ REST API endpoints on the frontend for authentication, user profiles, and referral request flows using JWT-based role access control.
- Built 12+ reusable React components and developed 10+ responsive pages, implementing modular UI architecture using React.js and Tailwind CSS.

Ghumoin

React.js | Tailwind CSS | Postgres SQL | Firebase

- Developed a frontend-driven tourism discovery platform using React.js and Tailwind CSS, fetching and dynamically rendering structured data from a database to display travel destinations and details in real time.
- Built 15+ reusable UI components and 6+ responsive pages/sections, including destination listing, category views, and detail display layouts.

Achievements

- Secured 3rd place among 30+ participants in the Technovate Hackathon, developing and presenting an innovative solution within a constrained timeline.
- Selected as a Top 6% team in the internal screening round of Smart India Hackathon 2023, earning the opportunity to represent the institution in India's largest innovation competition.
- Showcased a project at Parivartan 2024, presenting the solution to 30+ attendees and faculty members and receiving feedback from industry and academic experts.
